

Simple 3-Step Process

to professional looking stair treads:

Place Stair Step Scribe 2™ on stair tread, with pointed ends of guides facing the riser. Loosen all four knobs and extend the Stair Step Scribe 2™. Press the guides firmly against the edges of the step with the points touching the riser, then tighten all four knobs.

Lift the Stair Step Scribe 2™ off the step and set it on the board to be cut. Align the points of the guides with one edge of the board. Holding the Stair Step Scribe 2™ firmly in place, draw a line on each end of the Stair Step Scribe 2™ along the sides of the guides.

Cut board to lines. We recommend using the double-cut method on the Magnum Shear™.

*Fit your board
on the stair tread and see
the fantastic results of the
Stair Step Scribe 2™.*
